CHINESE GIANT

KING OF MAMMOTH OR POTIRON PUMPKIN

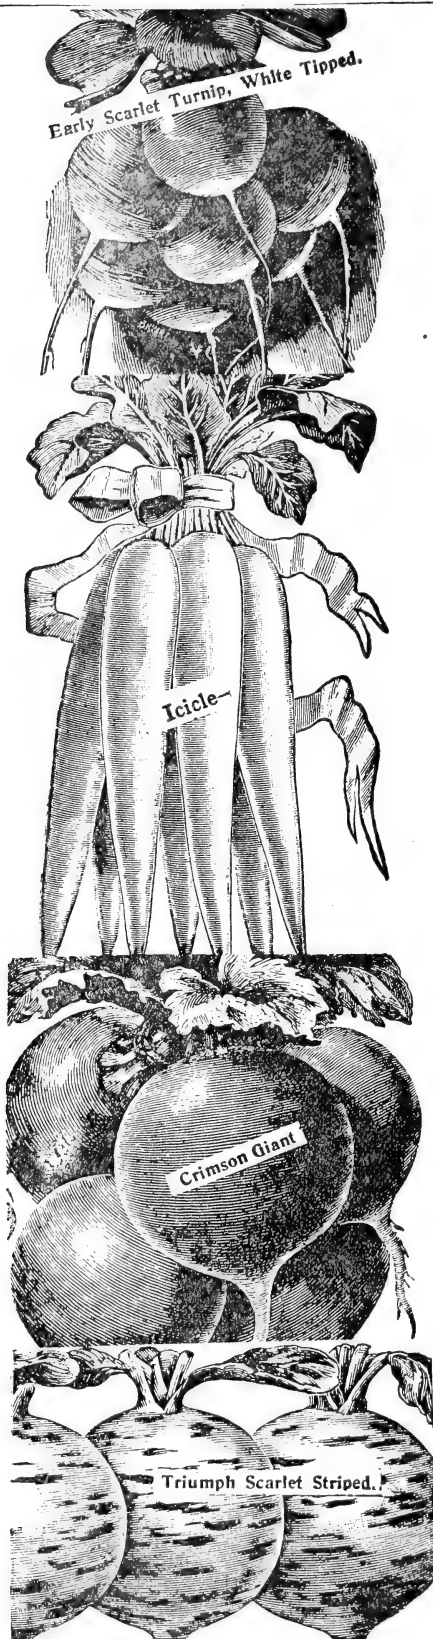

Giant Size, Weighing as High as 250 Lbs.

Good Quality.

Over twenty years ago the writer was attracted by some of these pumpkins growing in a gardner's yard and secured some seed. Those first specimens were very even, handsome and must have averaged 100 pounds each. This sort has now become very popular. Notwithstanding their immense size, they are fine grained and make excellent pies. Pkt. 5 cts., oz 15 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

TO THINK ABOUT.

NO matter what you pay for seeds, no matter where you buy, you *can not* get better seeds than we offer. The writer has had 35 years experience growing and selling seeds. He knows pretty well how every seedsman gets his seeds and how they are grown, and he knows none exercise greater care to have good seeds than we. He also knows that our seeds cost as much as those offered by any one and that some use a handsome, highly illustrated catalogue to tell how superior their seeds are, when oftimes they are inferior to ours. Those catalogues are very expensive. The firms issuing them must sell at a high price to meet this expense. If you buy their seeds you are helping pay for catalogues as well as paying for seeds. If you buy ours you pay only for seeds and get good ones. *We guarantee them.* Few firms dare do that, they say it is too expensive. Over one half of the seed firms in the country are managed by clerks, or managers who know nothing of seeds, growing them or varieties, they buy and sell on speculation. If the labels get misplaced on two kinds of beans or peas, or anything, you are sure to get the wrong sort, as no one knows it. Our business is handled by seed experts. Take out and throw away the labels, and we would make no mistake. **MORAL—** Deal with reliable people who know their business and get good seeds and fair prices.

→The Choicest in Flower Seeds←

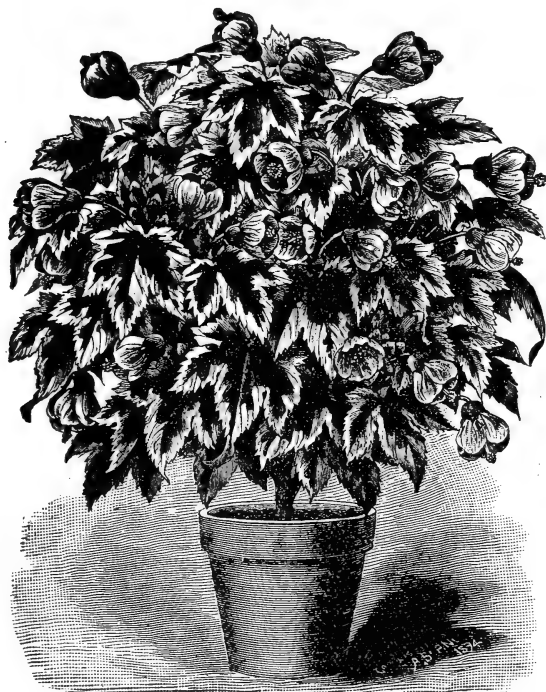

WE are extensive growers of flower seeds, probably growing more than all the other seedsmen of New York state combined. We grow only the best. What we can not grow here are mostly grown for us by the best European growers. When you buy of us you get fresh, reliable seed, not some old stuff that has been imported for years.

ANNUALS bloom the first season, produce seed and die.

BIENNIALS produce plants the first season, which bloom the second and then die.

PERENNIALS produce plants the first season which usually bloom the second and live for years.

It is only necessary in ordering Flower Seeds to write the number preceeding the variety you want. We can fill the order as well from the number as when you write the entire name.
